DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 6-8, 10, 11 and 13-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Schulken et al (US Patent 5,499,990). Concerning claims 14 –15, the implantable material has no limiting affect in this instance and further, the implant is not a portion of the tool.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schulken et al in view of Tiefenbrun et al (US Patent 6,331,182). The patent to Schulken et al is silent concerning both jaws are movable and rotatable about a longitudinal axis. However, the latter reference shows the well-known concept of providing movable jaws rotatable about a longitudinal axis in a surgical suturing device. It would have been obvious to one having ordinary skill in the art to provide Schulken et al with jaws that rotate about the longitudinal axis as taught Tiefenbrun et al so as to position the jaws at the desired location.

Allowable Subject Matter

Art Unit: 3731

Claims 9 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
